Career Objective

AI & Data Science trainee with strong foundation in Python, SQL (MySQL), Power BI, Machine Learning, Deep Learning, NLP, and Computer Vision. Experienced in building real-world projects such as predictive models, dashboards, sentiment analysis, and database management systems. Seeking an entry-level role in AI/ML, Data Analytics, or Data Science to apply technical and analytical skills in solving business problems.

Education

Class 12 (Science Stream)(CBSE), Heritage Public Sen.Sec School	2025
66%	Rajpura, Punjab
Class 10(CBSE), Heritage Public Sen.Sec School	2023
80%	Rajpura, Punjab

Internship / Training

Artificial Intelligence Programming Assistant - By DGT, Microsoft and Edunet Foundation - NSTI Ludhiana	2025 - 2026
--	-------------

Responsibilities / Learning:

- Learned to analyze, visualize, and derive business insights from data using Python, SQL, and BI tools.
- Gained strong foundations in computer systems, operating systems, Python programming, and database management.
- Built practical skills in AI, machine learning, deep learning, NLP, and computer vision for real world applications.
- Developed end to end AI solutions using Generative AI, GitHub collaboration, and Streamlit deployment.
- Data Science | Deep Learning | Computer Vision | NLP | Generative AI | AI in Action

Skills

- | | |
|--|--|
| <ul style="list-style-type: none">• Programming Python – Data analysis, automation, scripting, and machine learning model development.• Data Analysis & Manipulation Pandas – Data cleaning, transformation, handling missing values, filtering, grouping. NumPy• Data Visualization Matplotlib – Basic to advanced plotting for data insights. Seaborn• Database & SQL MySQL – Database design, querying, joins, filtering, CRUD operations. SQL – Writing optimized queries for data extraction and reporting. MySQL Workbench• Self Awareness• Communication Skill | <ul style="list-style-type: none">• Business Intelligence Power BI Desktop – Interactive dashboards, reports, DAX measures, data modeling. MS Excel• Machine Learning Scikit-learn – Model building, training/testing, classification, regression, evaluation metrics. Linear Regression. Logistic Regression• Generative AI• Deep Learning TensorFlow / Keras – Neural networks, CNN models, LSTM models for deep learning tasks.• Natural Language Processing (NLP) NLTK – Tokenization, stopword removal, stemming, lemmatization. Regular Expressions (Regex) – Text cleaning and pattern extraction. Sentiment Analysis |
|--|--|

Projects / Practical Work

Inventory Management System

- Tools: MySQL Workbench, Python (Designed and developed an inventory database system to store and manage product records. Performed CRUD operations and generated reports using Python-MySQL integration.)

Bank Loan Approval Analysis

- Tools: Excel / Python (Pandas, Seaborn) (Analyzed loan approval data to identify approval trends and important influencing factors. Created meaningful visualizations and insights for decision-making.)

Hotel Booking Analysis Dashboard

- Tools: Power BI Desktop (Built an interactive dashboard to analyze hotel booking trends, cancellations, and revenue insights. Applied filters and KPIs to highlight seasonal booking patterns.)

Heart Risk Prediction

- Tools: Python (Linear & Logistic Regression) (Developed ML models to predict heart disease risk based on health features. Performed preprocessing and evaluated model performance.)

Image Caption Generator

- Tools: Python, CNN + LSTM (Implemented deep learning model to generate captions for images. Used CNN for feature extraction and LSTM for caption sequence generation.)

Aspect-Based Sentiment Analysis

- Tools: Python, Pandas, Regex, NLTK, Scikit-learn, Matplotlib, Seaborn (Built NLP pipeline for aspect-based sentiment classification. Cleaned text data using regex and applied ML techniques for classification.)

Certifications

Career Essentials in Data Analysis

Microsoft and LinkedIn, 2026

Prepare Data for Analysis with Power BI

Microsoft and LinkedIn, 2026

Clean, Transform, and Load Data in Power BI

Microsoft and LinkedIn, 2026

Query and Modify Data with Transact-SQL

Microsoft and LinkedIn, 2025

Create Machine Learning Models

Microsoft and LinkedIn, 2025

AI Fluency

Microsoft and LinkedIn, 2025

Career Essentials in Cybersecurity

Microsoft and LinkedIn, 2025

Career Essentials in Software Development

Microsoft & LinkedIn, 2025

AI Security Fundamentals

Microsoft and LinkedIn, 2026

Achievements

Top Performer - Power BI Mini Project National Skill Training Institute Ludhiana.

11/03/2026

Creation of images using Copilot during AI skill Yatra assignment by Microsoft & DGT
NSTI Ludhiana

2026
